Effective Date: 28/09/2026

New Tick Size Structure

Dubai Financial Market (DFM) announces an update to the tick size structure for listed securities trading between price 1 to 1.995 as part of its ongoing tick-size review framework. This enhancement aims to improve market efficiency, reduce transaction costs, and support more accurate price discovery, while ensuring continued market liquidity.

The revised framework introduces more granular tick increments for mid-priced securities, aligning with observed trading behavior and international best practices to ensure that price movements correspond appropriately to securities' price levels. The new tick size structure will apply to all equities, Exchange Traded Funds (ETFs), and Real Estate Investment Trusts (REITs) trading between 1 to 1.995 price.

These changes will take effect on **28 September 2026**.

New Tick Size Structure

Price Range (AED)	New Tick Size (AED)
1 – 1.995	0.005
